

The background of the slide features a complex, abstract pattern of thin, wavy black lines that create a sense of movement and depth against a light grey background. On the left side, there is a solid teal-colored rectangle. The text 'MINI-PROJECT' is written in white, uppercase letters within this rectangle.

# MINI-PROJECT

---

# ABSTRACT

- The major goal of the website is to give students more options once they graduate from high school. They receive calls from colleges all across the world for enrolling without informing them. But with the aid of this website, we can obtain information on colleges, including their rankings, locations, photos, and user reviews, enabling users to select the colleges of their dreams.
-

# ABSTRACT

- We will be able to search the colleges by name on the website using a search query. We can also see where they are, which will be a Google Maps embed view. This web application's key feature allows us to select universities based on our percentages, grades, and geography, giving the student the freedom to select the colleges of their choice. Also, students may see how many courses are offered at the college and how many steps remain so that they can plan their next move.

# STRUCTURE CHART

# MODULE DESCRIPTION

- Administrator
  - i. The administrator has the ability to update or add information about the colleges on the website.
  - ii. Can add suggestions to the website for the users.
  - iii. Also update locations and other new feature to the website.
